

Virtual Interactive Fire Safety Training (game-based learning)

WPS Virtual Interactive Fire Safety Training offers supervisory staff a more engaging way to learn and review fire emergency procedures. Delivered remotely by a live WPS instructor, this game-based session keeps participants actively involved from start to finish.

Each session is tailored to your building systems, emergency procedures, and designated emergency personnel roles. Participants follow the presentation by screen share and use a second device, such as a mobile phone, to answer timed quiz questions in real time.

This program provides an effective alternative to traditional training, making it easier for supervisory staff to participate remotely from the workplace or home office.

PARTICIPANTS - SUPERVISORY STAFF:

- Floor Warden Team
- Command and Operations Team

*Sessions are delivered separately for each group.

WHAT PARTICIPANTS GAIN:

1. Better understanding of fire emergency procedures
2. Improved confidence in carrying out assigned responsibilities
3. More active participation through interactive quiz-based learning
4. Reinforcement of key concepts through instructor review and discussion
5. Introduction to the WPS Evac app

*Prior to the session, participants should download the WPS Evac app from the App Store or Google Play and sign in using their ePlan login credentials.

SESSION FORMAT:

- Remote, live instructor-led training
- 90 to 120 minutes
- Join by computer, laptop, or tablet
- Use a second device to answer quiz questions

BONUS INCLUDED:

Receive 90-day on-demand access through the WPS Evac app.

This added access gives participants more flexibility and allows them to revisit the training after the live session.
